## IN THE SPECIFICATION:

**Please replace paragraph 2 at page 32, with the following rewritten paragraph:**

First, with reference to the block diagram of Fig. 11 illustrating the functional structure of the server, the functional structure of the server will be described. A packet transmitting/receiving section 701 ~~receives~~ transmits a packet to the client and receives a packet from the client. A packet generating/analyzing section 702 performs a process of generating a packet to be transmitted and a process of analyzing a received packet. This corresponds to address setting of the packet, address recognition, data storage in a data storage section of the packet, a data acquisition process from the data storage section, and the like.

**Please replace paragraph 1 at page 34, with the following rewritten paragraph:**

Next, the functional structure of the client device will be described with reference to Fig. 12. A packet transmitting/receiving section 801 ~~receives~~ transmits a packet to the server and receives a packet from the server. A packet generating/analyzing section 802 performs a process of generating a packet to be transmitted and a process of analyzing a received packet. This corresponds to address setting of the packet, address recognition, data storage in a data storage section of the packet, a data acquisition process from the data storage section, and the like.
